

Workshop Question:

What can we do to ensure that the future library is a center of content creation and technology exploration?

Transform Staffing and Training	Invest in Pilot Projects	Provide Flexible Space	Facilitate Change through Administrative Leadership	Motive Leadership to Recognize Unique Role	Tell Our Story
Invest in staff training Allow current staff to learn on their own Hands on training for staff Provide staff access to tools Train staff Reach out to innovators outside the library Hire differently Hire early adopters of technology NOW Staffing-strategic hires and training Proper training and recruitment	Focus resources on writing grants for pilot development Find local doable project to start with Acquire emerging technology Look beyond libraries for inspiration	Adaptable space Plan flexible space Flexible/adaptive space Evaluate collection to make space	What to do with created content Rethink ownership of content Create clear policies Written policies Data collection, evaluation reporting	Engage funding bodies Invest money: budget alignment with strategic goals Social justice -access Find appropriate partners	Convince public Ask/poll community on what they want Start talking with stakeholders (funders, staff) about value Target key segments of community around needs and concepts Market library as place to create Market the project to community Traditional services not forgotten
